Climate Change and Human Health Literature Portal

Temperature changes and the risk of cardiac events

Author(s): Michelozzi P, De Sario M

Year: 2010

Journal: BMJ (Clinical Research Ed.). 341: c3720

Source: <u>http://dx.doi.org/10.1136/BMJ.c3720</u>

Resource Description

Exposure: M

weather or climate related pathway by which climate change affects health

Temperature

Temperature: Extreme Cold, Extreme Heat, Fluctuations

Geographic Feature: M

resource focuses on specific type of geography

None or Unspecified

Geographic Location: M

resource focuses on specific location

Non-United States

Non-United States: Europe

European Region/Country: European Country

Other European Country: United Kingdom

Health Co-Benefit/Co-Harm (Family Planning/Population Reduction): ■

specification of beneficial or harmful impacts to health resulting from efforts to promote family planning or reduce population growth as a climate change adaptation or mitigation measure

A focus of content

Health Impact: M

specification of health effect or disease related to climate change exposure

Cardiovascular Effect

Cardiovascular Effect: Heart Attack

Climate Change and Human Health Literature Portal

Population of Concern: A focus of content

Population of Concern: **☑**

populations at particular risk or vulnerability to climate change impacts

Elderly

Other Vulnerable Population: Previous coronary heart disease; Socially isolated

Resource Type: **☑**

format or standard characteristic of resource

Research Article

Timescale: **™**

time period studied

Time Scale Unspecified
